

How to apply the patch

◆ Important Notes

- This patch is to be applied exclusively on spGate 2018.2 (64bit).
- Log in to the computer as a user with access to the folder where spGate is installed (Default: C:\Program Files\Armonicos\spGate).
- Check and make sure that spGate is not running.

1. Decompress "spGate2018.2_patch.zip."
2. After decompressing, you will find a "64bit" folder.
3. Using Windows Explorer, go to the folder where spGate.exe is.
Example(When spGate is installed on 64bit OS using default configuration):
C:\Program Files\Armonicos\spGate64_15.3.15
4. Copy files in the "64bit" folder which was decompressed in step 2, and overwrite the ones in the folder in step 3.
